Bavul collection

by LEA AVIANI

Bavul is a multifunctional upholstered object that transforms from a bench to a bed. Its shape and a name are a reminiscence of a Dalmatian antique chest that was used for storage, seating or travel, and it was handed over as a legacy inside the family. Bavul in its basic form serves as a seating system in a living room, dining room at a table, or in a hallway – waiting to welcome your needs for the additional bed. Its dimensions are also perfect match

for the hospitality projects where it saves the precious space. With strong visual appearance and color combinations, Bavul blends in various interior styles.
