# Bik collection

by **NUMEN / FOR USE**

**Bik** is the chair reduced to its basic elements; four legs, seat and a backrest. A barely visible decrease of width of the legs, frontward inclination of the back legs and slightly overstated curvature of the backrest define the character of this otherwise archetypal chair. Wider back legs are slightly detached aside enabling easy stacking when chairs are not in use. The structure is made of solid wood and the seat and the backrest of molded plywood.
