Kontrapunkt recliner

by NEISAKO

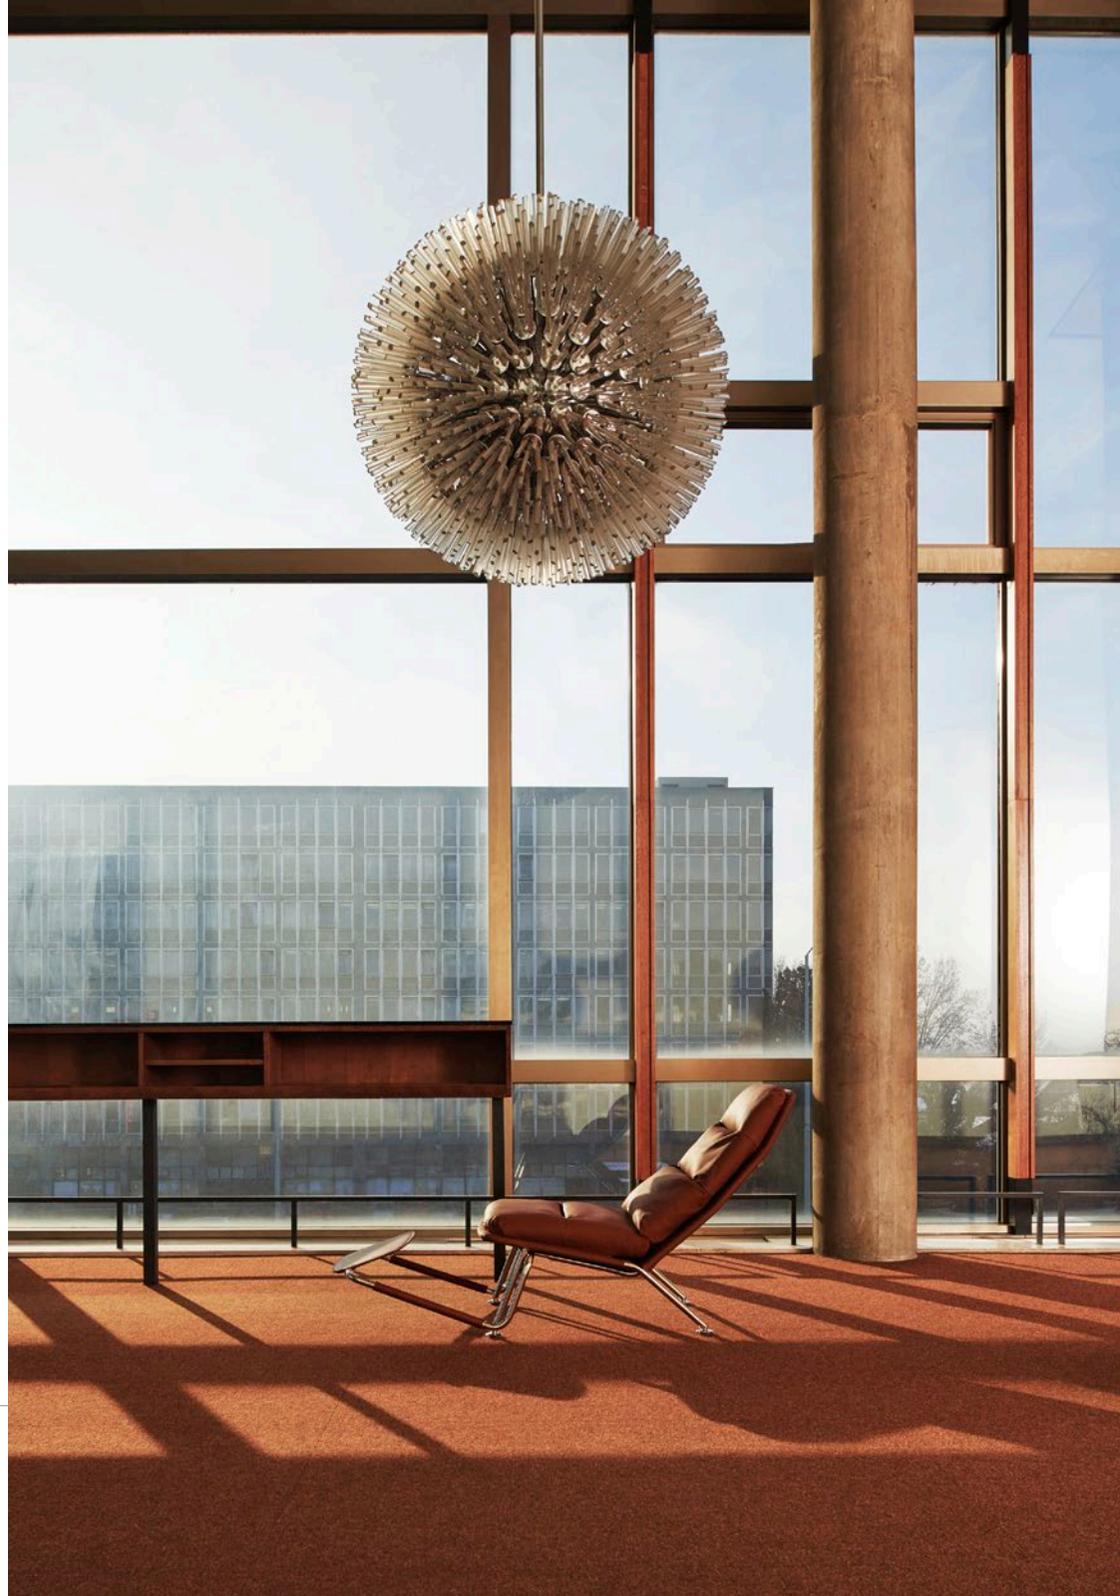

Kontrapunkt is a minimalist recliner, an alternative to the standard bulky recliner armchair typology. Simple elegant transition from the armchair to a chaise lounge position was achieved by using the armrests as part of an innovative mechanism. It holds the leg pad extension and tilts the backrest into the proper position. The overall design is minimal and lays the product's structural parts bare, without compromising its aesthetic of visually light object. Comfort is a result of an ergonomic shape and material elasticity, particularly

of the different versions of the product's skin, upholstered in fabric or leather. The change of skins transforms its character, making it suitable for various situations of interior use. The very name Kontrapunkt (counterpoint) means "two opposite points", and comes from music, where it denotes a method of composing two parallel melodic lines into one harmonious whole.
