Osmo collection

by **NUMEN / FOR USE**

Osmo is a series of seating objects developed on the classic typology of chairs for terraces in hotels and restaurants. The inox structure combined with wooden seat and backrest provides an optimal equilibrium of comfort and rigidity required in demanding context of extensive use in exterior exposed to sun and seawater. A bent tube structure defines the frame in which the seat and backrest

made of wooden slates are inserted into. The characteristic inclination of front legs combined with extremely wide, fractured armrest, results in a biomorphic appearance reminiscent of an insectoid robot from SF movies.
