

Simetria coat stand

PRODUCT SHEET

Simetria coat stand

by **NEISAKO**

The name of the coat stand **Simetria** reflects its symmetrical form resulting from the rotation and mirroring of the same linear support. This principle enables rationalisation of material consumption while the easy disassembly of the construction makes additional convenience which simplifies the construction and transport in the "flat pack" form. The lesion between straight lines on the juxtaposed pyramids changes depending on the viewing angle - from a static and symmetric vision into a dynamic and vibrating form.

SPECIFICATIONS AND TECHNICAL DRAWING

STRUCTURE solid wood + lacquer or black lacquer
