PRODUCT SHEET

# Shtef shelving system

by **3LHD, GRUPA**

The basic structural module is a square that is applied on the wall as a visually autonomous object. However, to make the system adaptable to various ambiances and intended purposes, several modules with different proportions have been developed as well as freestanding variants. L-cross-section shelves are inserted in the structural module; they come in 5 different formats and can be used together with the rear part mounted upward or downward. **Shtef** shelf is made out of aluminium to achieve lightwightness.
