The following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (N = 1,000). The independent variables are "Age of the head of household" and "Gender of the head of household". The table includes the coefficient estimates, standard errors, t-statistics, and p-values for each variable.

[illegible]

prosbolia

1. A collection of fragments of ancient Greek literature, including the works of Homer, Hesiod, and the tragedians, which were used by the Romans as a source of material for their own literature.

2. A collection of fragments of ancient Greek literature, including the works of Homer, Hesiod, and the tragedians, which were used by the Romans as a source of material for their own literature.

3. A collection of fragments of ancient Greek literature, including the works of Homer, Hesiod, and the tragedians, which were used by the Romans as a source of material for their own literature.
