How do you know you should go to
college? Do you want to be a doctor?
Do you want to be a lawyer? Do you
want to be a teacher? Do you want
to be a scientist? Do you want to be
a business person? Do you want to be
a professional? Do you want to be a
leader? Do you want to be a winner?

The following table shows the results of the regression analysis for the dependent variable "Number of publications" (N = 100). The independent variables are "Gender" (Male/Female) and "Age" (Young/Middle/Older). The table includes the coefficient estimates, standard errors, t-statistics, and p-values for each variable.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
