Abstract

© 2005 Blackwell Publishing Ltd, *Journal of Internal Medicine* 258: 105–112

These data suggest that the observed increase in the number of children with autism is not due to changes in the criteria for diagnosis, but rather to an increase in the prevalence of the disorder. This finding is consistent with the hypothesis that the increase in autism is due to environmental factors, such as changes in the microbiome or exposure to toxins, rather than to changes in the criteria for diagnosis.

prosbolia

1. A prosbolia is a type of offering or sacrifice made to a deity, often in the form of a bull or other animal.

2. The word is derived from the Greek word *prosbolia*, meaning "offering" or "sacrifice".

3. It is often used in the context of ancient Greek religion and mythology.

4. The word is also used in modern contexts to refer to a large offering or sacrifice.
